

Versa Arch

Versa Arch

The Hanna Versa Arch is the perfect blend of form and function. The solution manifold is constructed from 1 1/2" electro-polished tubular stainless steel formed in the shape of an arch. The Versa Arch can be fitted with various nozzle kits to deliver foam, presoak or finishing chemicals like drying aid or clear coat. The Versa Arch can also be used as a high pressure rinse or flood arch. The Versa Arch offers the car wash operator the flexibility to change with your business needs.

- 1 1/2" Tubular Stainless Steel
- Electro polished finish
- Eleven welded and threaded nozzle points
- Water feed at three points bottom left and right and top center
- Vehicle Clearance-96" (243.8 cm)
- Width - 124" (315 cm)
- Available for use as:
 - Foaming Applicator
 - Pre Rinse/Final Rinse
 - Cool Down
 - Clear Coat
 - Drying Aid
 - Spot-Free Rinse
 - High Pressure Rinse
 - Flood Rinse

Hanna Versa Arch Light Kits

Available in Red, Yellow, Blue and Green, the Versa Arch Light Kit is the perfect choice to bring attention to your car wash and grow your sales of on-line services. The LED light strand comes standard with mounting clips for your Versa Arch and does not require a power supply or flasher when used with Hanna's Washlink Series of tunnel controllers.*

The Versa Arch Light Kit is available with an optional independent power supply and flasher if your tunnel controller requires. Ask your Hanna representative for help.

Graphic Arch

The **Graphic Arch** is a decorative stainless steel arch that allows the operator the flexibility to select graphics (basic or custom) to aid in the sales of extra services and products. The Graphic Arch has a built in 1 1/2" tubular stainless steel with eleven nozzles and can be fitted with various nozzle kits to deliver foam, presoak or finishing chemicals like drying aid or clear coat. The Graphic Arch can also be used as a high pressure rinse or flood arch.
